

# CDC LANDMARK VB

CWRS Wheat

## It Has It All!

It's not just a top yielder, it's the whole package. CDC Landmark VB is the first midge tolerant wheat that is ultra high yielding, semi-dwarf, and protects against fusarium head blight. This isn't just a slam dunk for midge tolerant wheats, it's a great replacement for all CWRS wheats. CDC Landmark VB really has it all.

## Highlights

- Top-in-class yield; up to 113%\* of the checks
- Wheat midge tolerant
- Leading standability in a varietal blend
  - » Semi-dwarf and semi-solid stem
- Intermediate to FHB; a strong base for a fusarium IPM system

## Insights

"Wow! This variety has it all. Yield, midge tolerance, good disease package. It was a dream to harvest and kept the trucker very busy. It was the top yielder on our farm and one of the top yielders in the local area. CDC Landmark will be planted on all my wheat acres next year."

- Brent McCarthy, McCarthy Seed Farm Ltd.,  
Corning SK

"CDC Landmark VB has exceeded my expectations with yield and quality this season. When a new variety averages yields in excess of 85 bu/ac, I am excited to share this with my customers and see them achieve great things with this new variety."

- Mark Keating, Keating Seeds, Russell MB

"Varieties like this don't come along very often. CDC Landmark is high yielding, has midge tolerance, a good disease package, stands well, and a semi-solid stem that may also supply some sawfly tolerance. This variety looks like a winner."

- Ron Markert, Markert Seeds, Vulcan AB

## Adaptability

CDC Landmark VB is well suited for all areas of Western Canada.

## Insights

“CDC Landmark VB is a great improvement on lodging, fusarium rating and thrashability in a CWRS blend. It will be the variety of choice by commercial growers for many years to come.”

- Daryn Woods, Ferndale Farms Partnership, Rocanville SK

“CDC Landmark VB is a good thrashing, great yielding, short stature varietal blend that will set new standards in the CWRS midge tolerant class.”

- Jim Etter, Etter Seed & Processing Ltd., Regina SK

“Very uniform stand throughout the growing season and into harvest which made spraying and combining a breeze. High yield along with large seed size and excellent color. Next generation of midge tolerant semi-dwarf wheat that we are recommending to customers and will be very popular in coming years.”

- Kevin Craswell, Craswell Seeds Ltd., Strasbourg SK

“We grow CDC Landmark VB and we were very impressed with the results. It’s one of the first semi dwarf midge tolerant varieties with strong straw that is semi solid. Yield losses to insects are much larger than most growers realize and the variety will help combat those issues.”

- Tim Pizzy, Inland Seed Corp., Binscarth MB

“CDC Landmark VB CWRS is a very nice semi-dwarf midge tolerant wheat that fits well with most commercial farms. CDC Landmark VB performed very well on our farm.”

- Ken McDougall, McDougall Acres Ltd., Moose Jaw SK
