## AB Advantage 6-Row Feed & Forage Barley

Progress Through Research  
Le progrès grâce à la recherche

### Description:

AB Advantage is a dual purpose smooth awned 6-row barley with excellent grain and forage yield potential. AB Advantage is a full height 6-row that stands very well and has large plump kernels. With a smooth awn, and high biomass AB Advantage is well suited to forage/silage/ feed for western Canada.

Parentage: H97098003/Sundre

### Strengths:

- Grain yield 105% of Vivar and 102% of CDC Austenson in registration cooperative trials
- Forage yield 102% of Vivar and CDC Austenson in forage barely registration trials
- **Smooth awned**
- High % plump and heavy TKW and bushel weight compared to Vivar and AC Ranger
- Better lodging tolerance than AC Ranger and slightly weaker than Vivar in registration trials

### Neutral Traits:

- Full height - +18cm compared to Vivar
- Intermediate resistance to surface-borne smuts, loose smut, stem rust, scald, spot blotch and spotted form net blotch
- Medium-Late maturity, +2 days later than Vivar
- Forage quality similar to the checks Vivar and AC Ranger

### Weaknesses:

- Moderately susceptible to netted net blotch
- Susceptible to FHB

### Breeder:

Dr. Joseph Nyachiro  
Field Crop Development Centre  
Alberta Agriculture and Rural Development  
Lacombe, Alberta

**PBR 91 Protected**

### 2016 and 2017 Western Cooperative Six-Row Barley Registration Trials

Variety	Grain Yield % AC Ranger	Heading (days)	Maturity (days)	Height (cm)	Lodging 1 = erect 9 = flat	1000 Kernel Weight (gm)	Test Weight (g/hl)	% Plump
AC Ranger	100	56.3	91.8	85.5	5.2	40.3	61.0	79.7
Vivar	101	56.9	90.5	79.8	3.4	40.8	61.1	83.3
